

HOW TO PREVENT INFECTIONS IN YOUR HEART, LUNGS AND BRAIN?

Clean your skin with rubbing alcohol wherever you're going to inject. Your skin is covered in germs you don't see.

Don't reuse your own needle: Germs are growing in it, and those germs will get injected into you!

Always use clean works: Never reuse them.

WHAT TO DO IF YOU HAVE AN ABSCESS.

Go see a doctor immediately.

Doctors do not call the police; they do treat your abscess.
