

## *FENTANYL KILLS, HERE'S HOW YOU CAN STAY ALIVE!*

Help each other.  
Don't use alone - Pair up

Fentanyl kills quickly. Make sure you and your friends carry naloxone.

Fentanyl comes in pills, pure powder and powder mixed with other drugs, especially heroin and cocaine. You can't see it, smell it or taste it. Whatever you do, start low, and go slow.

If you think it's an overdose, **call 911**. Every minute counts.

In Kentucky you cannot be charged with possession if you are calling for help with an overdose.
